

LIDGET
The Best Concrete Garage

The New Garden Room from Lidget

The addition of maintenance free PVCu doors, windows and glazed units to our highly regarded concrete buildings enables us to offer a Garden Room in a range of different shapes and sizes.

The Lidget Garden Rooms all come with our no fuss 10 year structural guarantee

Begin to imagine your Lidget Garden Room

Our main picture shows a 12ft x 12ft Apex, with a green coloured roof, white PVCu gutters, a 4ft double fully glazed PVCu door, two 2ft full height glazed PVCu panels, a 3ft half glazed residential PVCu door, and a 4ft PVCu window, all in white. We can also offer the PVCu in Light Oak, Mahogany and Brown.

How would you like yours?

A room built around you

Utilising our range of PVCu units, the Garden Room can be constructed for you from our standard range buildings, including a Pent roof, Apex roof (*shown over*), Windsor tile effect roof or the top of the range Metrotile roof. The whole range of sizes of our standard buildings is available, with widths from 4ft to 26ft, lengths to suit.

You can choose from our exclusive Stone and Brick effect wall finishes, or specify your building in plain panel finish for site rendering. We can even provide wall finishes on, say, two of four sides, if you're fitting the Garden Room into a corner site, maximising appearance whilst minimising cost.

A range of 6 coloured roof tiles are available on our Apex buildings, and the Metrotile roof also has 6 colours to choose from, talk to your building specialist to check out your options.

A LIDGET THOUGHT

With many Garden Rooms being made of timber, positioning them close to a boundary with the attendant fire risk will mean that building control approval will not be granted – concrete is non combustible, so minimising any fire risk – thus giving you peace of mind.

The Garden Room can be incorporated into your garage – we will provide a partition wall, and your Garden Room becomes an extension on your garage. Specified at the same time as the main garage, costs are reduced. PVCu units can be used to provide a double aspect to your Garden Room – put them in the side wall as well as the end wall to give maximum visibility and light.

The building can be lined out, and with the provision of electricity (by others) can become a wonderful retreat, or can be used as a home office, music/hobby room, gym – the possibilities are endless. We provide the building, you provide the use!

MAXIMUM FLEXIBILITY WITH OUR RANGE OF PVCu WINDOWS AND DOORS FOR YOUR GARDEN ROOM. THE CHOICE IS YOURS*.

The following units are available as standard – if you have a requirement for a different size, please contact Customer Services. As part of the unique Lidget product offer, we can provide a Bespoke Building Service, giving you exactly what you want – just ask your Lidget building specialist.
