Glass on roof overhangs roof to prevent 'rot spots'

EVOLUTION TEN

Cedar Greenhouses

Upgrade to Aluminium Bar Capping

Evolution models come with a Cedar capping system to retain the glass. You can upgrade this to an aluminium system which is coated in an attractive powdercoated Moss colour. This makes your greenhouse virtually maintenance free.

Recommended staging

This new four slat staging is ideal for this model. At 25" wide it provides an ideal work bench for one side of the greenhouse. The powder coated finish in the moss colour blends perfectly with the natural wood. For the ideal set-up add a full length of this plus a high level shelf - which leaves the other side of the greenhouse free for tomatoes etc.
